

## WHAT TO BRING –

1. Appropriate Clothing – Although it may be warm when you pick-up your rental(s), the weather will often get quite cool as you climb in elevation. Layers are recommended.
2. Sun Screen – Protect your skin! Increases in elevation will put you closer to the sun and you will get burned very easily, cover up!
3. Sunglasses or Goggles – Arizona trails are very dusty, dry and rocky, eye protection is highly recommended.
4. Wet Weather Gear – Rain storms can happen without notice, be prepared!
5. Appropriate Footwear – No crocs, flips-flops or open-toed shoes. Well-fitting, durable footwear is recommended.
6. First-Aid Kit – Accidents do happen, being prepared for minor medical issues is recommended.
7. Food and Water – Having extra food and water is ALWAYS a great way to make sure that if you get lost or stranded, you will be prepared.

## TEN ESSENTIALS –

|                  |  |
